Detecto's Little Diaper Scale Model AP-4KD

**Big on
Accuracy,
Ease of Use
and
Affordability**

Detecto packs a lot of smarts into its compact diaper scale, designed to answer your every need in measuring fluid output. Its small design enables it to fit in anywhere, yet its roomy tray makes it easier to use than other larger models with skimpy trays.

In addition, stainless steel construction makes the removable tray a snap to clean . . . a major consideration in the nursery where repeated use is the rule. Time is also a precious commodity around newborns and this scale helps you make the most of it - the instantaneous display is easy-to-read. Handy, pushbutton tare simplifies weight determinations.

Affordability is another major feature. Backed by more than 90 years of scale manufacturing know-how, the AP-4KD is available at less than half the cost of other comparable scales. And this unit's large capacity makes it extremely versatile; it can be used for such other weighing tasks as the weighing of sanitary pads to measure a mother's blood loss.

Specifications

Capacity:	4000 g x 1 g
