

## *Control Two or More Dialysis Scales Simultaneously with Detecto's*

Multiple scales are continuously monitored by one programmable weight indicator. Throughout the dialysis process, patients' net gains or losses are monitored. When weight change equals or exceeds preset values, the display alerts attendants. Throughout dialysis, the display shows the original weights, the final weights and the net difference in either pounds or kilograms. As many as six scales may be used, each having their own preset value.

The indicator is equipped with a bidirectional serial port allowing it to be connected to a computer, while the standard printer port allows connection to an optional printer. A PC-style keyboard can be plugged into the indicator and used to enter the patient's name or identification number.

### **Specifications**

<b>Capacity:</b>	800 lb x .2 lb/360 kg x .1 kg
<b>Platform:</b>	36" x 38" (914 mm x 965 mm) easy-to-clean with wheels
<b>Display:</b>	Dot matrix plasma
<b>Power:</b>	90 to 260 VAC, 50/60 Hz
<b>PC-keyboard input:</b>	Standard DIN connector
<b>Serial Port:</b>	Bidirectional RS232, configurable
<b>Printer Port:</b>	RS232 compatible (output only)
<b>Features:</b>	Internal diagnostics, time and date with battery backup
<b>Options:</b>	Alarm output
